

HOW TO USE THIS LIST

Devices in this list are tested and approved for the AT&T network

Use the *exact models* in this list to see if your device is supported

See next page to determine how to find your device's model number

There are many versions of the same phone, and each version has its own model number even when the marketing name is the same.

➤ **EXAMPLE:**

- Galaxy S20 models G981U and G981U1 *will work* on the AT&T network
- Galaxy S20 models G981N and G981O *will NOT work*

Software Update: If you have one of the devices needing a software upgrade (noted by a * and listed on the final two pages) check to make sure you have the latest device software.

[Update your phone or device software eSupport Article](#)

Models listed here are not guaranteed to work on the AT&T network. AT&T cannot guarantee the capabilities or performance of any individual device that was not purchased directly from AT&T or an authorized retailer of AT&T.

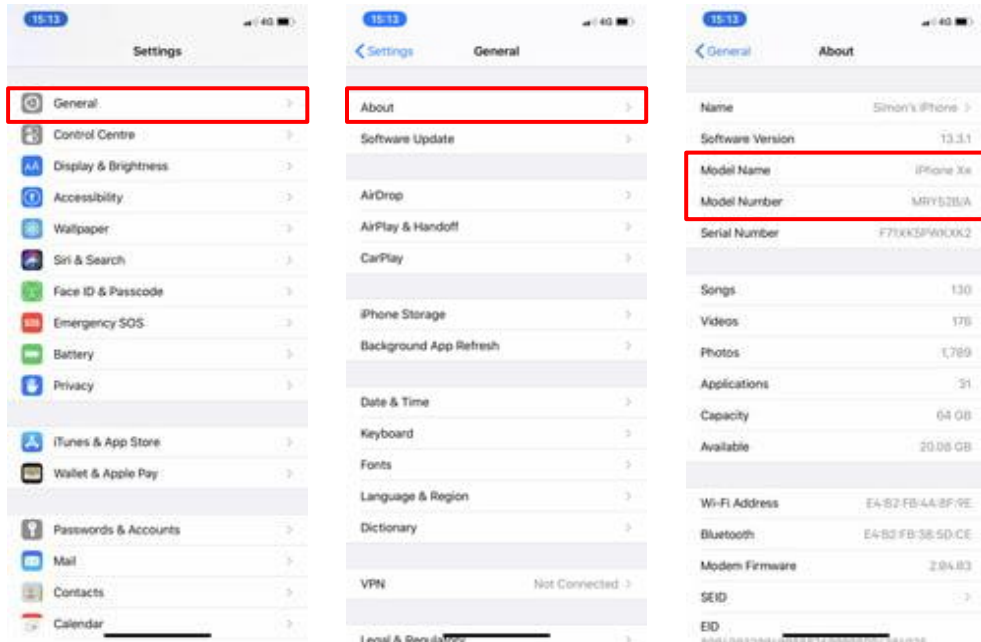

AT&T

How to determine your phone's model

Some manufacturers make it simple by putting the phone model on the outside of your phone, typically on the back. If your phone is not labeled, you can follow these instructions.

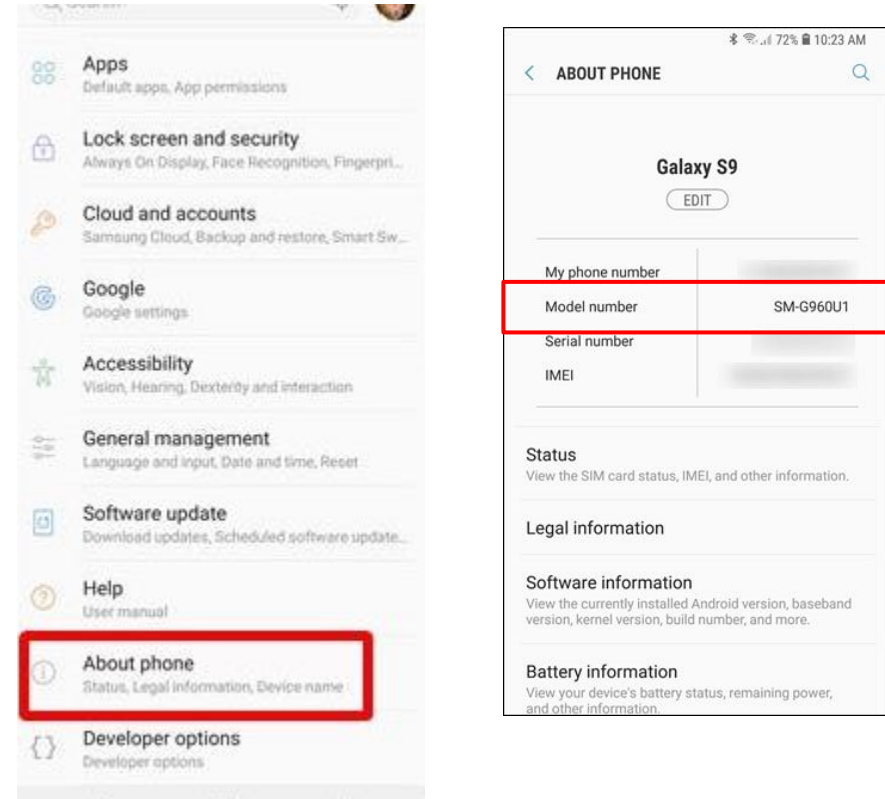

For iPhones®

1. Go to **Settings**.
2. Tap **General**.
3. Tap **About** to view the model name and number.

For Androids®

1. Go to **Settings**. You may have to go into the **System** menu next.
2. Tap **About Phone** or **About Device** to view the model name and number.

Other phones

1. Go to **Settings**.
2. Tap **About Phone** to view the model name and number.

OR

1. Remove the back cover.
2. Remove the battery.
3. Look for the model number on the inside of the phone, usually on a white label.

These phones are tested and approved for the AT&T network

Alcatel

- A3X (A600DL)
